## SOFTWARE ENGINEER

---

**Symphony**  
*Software engineer*

Novi Sad, Serbia  
March 2022 - Present

- Contributed to the development of a scalable e-commerce platform, collaborating on the architecture and implementation of robust solutions aligned with business objectives and user experience goals.
- Work on implementation of leading payment processors.
- Collaborate closely with the DevOps team to implement automated deployment pipelines and establish dynamic environments, driving efficiency and reliability in software delivery processes.
- Contribute expertise to the refinement and expansion of a music distribution platform, innovating features and functionalities to meet evolving market demands and user expectations.
- Facilitated the onboarding process for new team members, providing guidance and support to ensure smooth integration into project workflows and team dynamics.

**Levi9**  
*Software engineer*

Zrenjanin, Serbia  
Nov 2019 - March 2022

- Coordinate with a product team in the identification of customer requirements.
- Collaborate with frontend developers and other teams to integrate the backend service seamlessly into the overall architecture, facilitating smooth data flow and interoperability.
- Utilize AWS to deploy, manage, and scale the backend solution, ensuring high availability, reliability, and security of the service.

## PROJECTS

---

**Consent Manager (2019-2022)** *Node, AWS, Serverless*

Tool that allows users to manage their privacy preferences, granting or revoking consent for the collection and processing of their personal data.

**Learning & Licensing platform (2022-2022)** *Node, Next.js, AWS*

Learning management system (LMS) designed specifically for accounting and finance professionals. It offers features such as online courses, certifications tracking, and compliance management to help professionals in these industries stay up-to-date with regulatory requirements and advance their careers.

**B2B E-commerce (2022-2023)** *Nest.js, React, AWS, RabbitMQ*

B2B e-commerce application streamlines transactions between businesses, leveraging third-party integrations with Easyship for shipping and Airwallex for payments, ensuring seamless logistics and secure transactions.

**Injury Rehab Mobile Application (2023-2023)** *Strapi CMS, React Native*

Contributed to the development and maintenance of a mobile application for a company specializing in physical rehabilitation products. Implemented features such as training videos and progress tracking to support users in their recovery journeys.

**Music Distribution Platform (2023-2024)** *Java, React, AWS*

Music distribution platform that offered independent artists support in distributing their music globally, providing services such as artist development and marketing assistance.
